O!SAPIENS WEBSITE COPY. READY TO PASTE.

Priority order: 1) home page hero, 2) /work-with-me page, 3) housekeeping. Total: one Friday systems block, about 90 minutes.

PART 1. HOME PAGE HERO (replaces "A Science-Based System for Mental Resilience & Clarity")

Headline: Performance is biological first.

Subheadline: O!Sapiens helps founders and senior executives extend their healthspan: sleep, stress regulation, energy stability, and decision clarity, built on the SapiensOS framework. No hype, no willpower sermons. Protocols that survive contact with a real calendar.

Primary CTA button: Book the Executive Performance Diagnostic

Secondary CTA (text link under button): Not sure where to start? Take the 8-minute Executive Healthspan Audit

Proof strip (one line under the fold): Built on 1000+ hours of research across neuroscience, behavioral psychology, and human biology. 20+ years working with executives and leadership teams.

Page settings:

- Meta title: O!Sapiens | Executive Performance and Healthspan Coaching
- Meta description: Executive performance coaching built on biology: sleep, stress regulation, energy, and decision clarity. Start with a 90-minute Diagnostic and a written protocol within 48 hours.

Note on vocabulary: "mental resilience," "mental wellness," and "wellness protocol" come off this page and off the assessment page titles. The replacement vocabulary everywhere: performance, healthspan, capacity, protocol, system. Same work, executive language.

PART 2. /WORK-WITH-ME PAGE (new page, full copy)

Page title (H1): How we work together

Intro paragraph: Everything here runs on one idea: performance is biological first. Before mindset, before productivity systems, before another app, your output is set by sleep architecture, stress load, energy regulation, and recovery capacity. That is what we work on. This is coaching and education, not medical care. If your situation needs clinical support, I will tell you directly and point you to the right professional.
