

THE EU'S PRACTICAL LONGEVITY OPERATING SYSTEM

Sapiens OS HealthSpan

From health data to daily action: the longevity OS that makes healthspan habits stick.

Pre-Seed Investor Deck

Vladislav Andreev, Founder & CEO · One Species Limited, Cyprus

June 2026

High performers are optimizing everything except their biology.

Too much data, zero clarity

Oura. WHOOP. Apple Watch. CGM. Blood panels. The data exists. What's missing is a trusted system that converts it into the one thing worth doing today.

Wellness apps built for consumers, not operators

Meditation apps, supplement stacks, and generic AI coaches don't understand the nervous-system load of a board decision, a fundraiser, or a 14-timezone week.

The EU has no execution-first longevity OS

US-built platforms (Function, Superpower) are capital-heavy, lab-dependent, and US-centric. European high performers are underserved — and increasingly privacy-conscious.

THE SOLUTION

One framework. One action. Every day.

Sapiens OS HealthSpan reads wearable and Apple Health data, runs it through the proprietary 10-pillar nervous-system framework, and surfaces a single prioritized daily coaching prompt — plus a weekly review and “next 3 moves.” No diagnosis. No prescription. No overwhelm.

A behavior operating system, not a health dashboard.

- ✓ 10-Pillar Framework
- ✓ Weekly Review
- ✓ Privacy-First · EU Hosted
- ✓ Daily Action Prompt
- ✓ Apple Health + Wearables
- ✓ Phase 2: Lab Results

O!Sapiens HealthSpan

Today's priority

SLEEP

Your HRV dropped 18% over 3 nights. One change that will recover it by Friday.

Set your wind-down at 10:30 PM tonight.

Mark done

The 10-Pillar Sapiens OS Framework

A coherent, nervous-system-first protocol architecture — not a feature list. Every pillar resolves into minimum-effective-dose daily actions.

Sleep

Nutrition

Movement

Stress Regulation

Light / Darkness

Social Connection

Agency

Meaning

Rest

Curiosity

Proof first. Then build. Then scale.

Now

Months 0–5

- Paid founding-member beta (up to 20 members, manual delivery)
- 10-pillar intake, weekly reviews via email/Loom
- Demand validation before a single line of app code
- Building the outcome dataset from day one

Next

Months 2–8

- iOS MVP: onboarding, 10-pillar score, daily prompts, weekly review, Apple Health read
- First 100 paying members at €399/year
- ENISA non-dilutive loan application
- Warm B2B pilots: coworkings, founder communities

Horizon

Year 2–3

- Phase 2: lab result upload, biomarker dashboard, 6-month re-test cadence
- Sequential EU expansion: Spain/Cyprus → DE/NL/Nordics/UK/CH
- Clinician-review paid add-on (liability offload)
- Proprietary behavior-change dataset → durable moat

A niche that's large enough — and unowned.

~€25–30B

EU longevity market, growing ~9%
CAGR

The relevant number isn't the global longevity TAM. It's the slice of EU high-performers aged 35–55 who already own wearables, already pay for health subscriptions, and are actively looking for a system — not more data.

No competitor today owns the precise intersection Sapiens OS targets: EU-native, device-agnostic, execution-first, privacy-first, holistic 10-pillar framework, at an accessible price point — without labs, clinics, or hardware.

COMPETITION

The combination no one else owns.

Platform	Geography	Model	Positioning
Function Health	US	Lab-heavy, ~\$2.5B	Not EU
WHOOP / Oura	Global	Wearable platforms	No coaching depth
Superpower	US-only	AI reviews	Generic, no execution layer
Neko / Zoï	EU	Clinic / scan model	Asset-heavy, high price point
Sapiens OS HealthSpan	EU-first	Behavior OS, device-agnostic	Privacy-first · execution-first · 10-pillar · no labs

Wearables are treated as data partners, not rivals. The moat is the combination: nervous-system-first depth, founder brand, warm B2B distribution, EU privacy posture, and a proprietary behavior-change dataset instrumented from day one.

Simple pricing. Sequenced channels.

CORE EU MEMBERSHIP

€399

per year · ~€1/day · anchored against Function's
"\$1/day"

- ✓ Basic: €249–299/yr (lighter tier)
- ✓ Pro: €79–149/mo (high-touch)
- ✓ Phase 2: clinician-review paid add-on

SEQUENCING

Months 0–6

B2C only. Founder-led acquisition, zero paid marketing.

Month 6+

Selective warm B2B: coworkings, founder communities, professional groups — not procurement-heavy enterprise.

Ongoing

Sequential geography: Spain + Cyprus → Germany, Netherlands, Nordics → UK, Switzerland.

Founder-led. Zero paid marketing.

15,400+

LinkedIn connections

1,700+

newsletter subscribers

€0

paid marketing budget

LinkedIn (primary)

80% commenting, 20% original posts, direct outreach via Sales Navigator.

Speaking & events

Executive communities, founder networks, longevity conferences — presence over reach.

Russian-language outreach

Underutilized asset: Russian-speaking founder communities across European tech and finance.

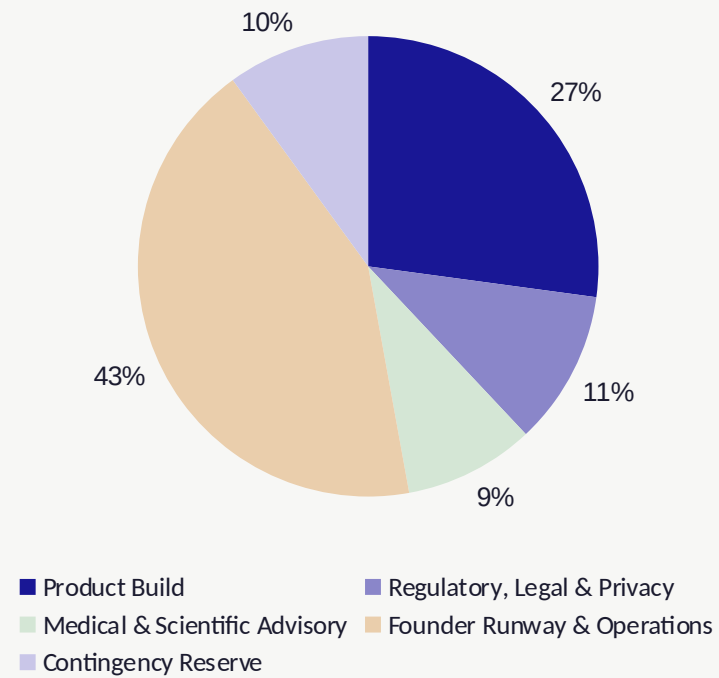

Warm B2B (from Month 6)

Coworkings, founder communities, professional associations — each partner is an endorsement.

THE RAISE

€300K–€400K Pre-Seed

Post-money SAFE. Raise opens after paid-beta traction is established — capital raised on proof, not promise. Complemented by an ENISA participative loan (non-dilutive, Spain Startup Law) to extend runway and reduce angel dilution.

TOTAL ASK (MODELED)

€350,000

Product Build	27%	€95,000
Regulatory, Legal & Privacy	11%	€38,000
Medical & Scientific Advisory	9%	€32,000
Founder Runway & Operations	43%	€150,000
Contingency Reserve	10%	€35,000

18-month runway. Full line-item breakdown with rate assumptions: Appendix A–C.

Product Build & Regulatory / Legal / Privacy

PRODUCT BUILD — €95,000 (Months 1–8)		REGULATORY, LEGAL & PRIVACY — €38,000 (Months 0–6, ongoing)	
iOS MVP build (senior nearshore freelancer, ~10 weeks)	€22,500	Spain SL / Cyprus structure — legal setup & review	€4,000
Backend + API infrastructure (HealthKit, push, database)	€18,000	GDPR Article 9 architecture + DPIA	€9,000
AI/LLM coaching engine (dev + 12mo production inference)	€8,500	Fractional DPO retainer (18 months)	€11,700
Post-launch iteration (part-time, ~10 months)	€22,500	Privacy policy, ToS, data processing agreements	€5,300
Phase-2 labs: OCR + biomarker dashboard build	€18,000	MDR non-classification legal opinion	€5,000
Phase-2 labs: flag-to-protocol clinical mapping	€5,500	Trademark / IP filing (Sapiens OS framework, EU)	€3,000

Planning estimates based on typical EU nearshore/freelance and Spain/Cyprus professional-service rates as of mid-2026 — not vendor-confirmed quotes. Validate before finalizing.

Medical Advisory & Founder Runway / Operations

MEDICAL & SCIENTIFIC ADVISORY — €32,000 (Months 0–18)	
Advisor retainers (3 advisors × €450/mo × 18mo)	€24,300
Quarterly protocol validation workshops	€4,200
Advisor agreement legal docs	€1,500
Red-flag / referral protocol design sprint	€2,000

FOUNDER RUNWAY & OPERATIONS — €150,000 (Months 0–18)	
Founder stipend (18 months @ €3,500/mo)	€63,000
EU hosting & infrastructure	€9,000
Software & tooling	€6,500
Corporate administration (Cyprus CSP, filings, banking)	€7,200
Accounting & bookkeeping (Spain + Cyprus)	€8,400
Insurance	€4,500
Travel & business development	€9,800
Founding-member beta delivery tooling	€4,000
Part-time community/ops contractor (mo. 12–18, contingent)	€18,000
Working capital reserve	€19,600

Contingency Reserve (€35,000 — 10% of total raise) is held separately; see slide 10.

Indicative Spend Phasing

Phase	Months	Focus	Est. Spend
Now	0–5	Legal/GDPR setup, advisory board assembly, beta delivery, founder runway	~€70,000
Next	2–8	iOS MVP build, backend/AI engine, continued founder runway	~€130,000
Horizon	9–18	Phase-2 labs, contingent ops hire, scale operations, contingency reserve	~€150,000
Total	18-month runway to next milestone		€350,000

This is indicative phasing, not a contractual cash-flow schedule. All vendor costs (development, DPO, advisory) are planning estimates pending fixed quotes — to be validated before finalizing.

Founder-led. Advisory-backed.

Vladislav Andreev — Founder & CEO · Barcelona

Executive coach and entrepreneur with 15,400+ LinkedIn connections and 1,700+ newsletter subscribers in the EU founder/executive community. Former mental-health educator. Edge: systems thinking, nervous-system-first protocols, turning complexity into minimum-effective-dose interventions. Owns protocols, messaging, partnerships, and sales. Legal entity: One Species Limited, Cyprus.

Medical & Scientific Advisory Board

Being assembled · retainer + equity. 2–4 advisors. Evidence hygiene, protocol validation, red-flag and referral rules.

iOS Contractor (nearshore)

Hiring · 8–12 week MVP build. Senior iOS developer, scoped, milestone-based engagement.

Fractional DPO + Privacy Counsel

Contracting · EU compliance. GDPR Article 9 architecture, DPIA, EU hosting compliance, investor-DD-ready.

The moat is the combination.

01

Nervous-system-first depth

The 10-pillar framework is not a feature list. It's a coherent protocol architecture built over years.

02

Execution-first positioning

Every insight resolves into a scheduled, minimum-effective-dose action. No dashboard paralysis.

03

EU privacy as product advantage

GDPR-by-default and EU hosting aren't compliance costs — they're what the ICP actually wants and competitors can't match.

04

Founder distribution

15,400+ LinkedIn connections. 1,700+ newsletter subscribers. Zero paid marketing needed for the first 1,000 members.

05

Validate before raise

Paid beta before any tech build. Deposits before commitments. Capital raised on traction, not deck.

06

Proprietary outcome dataset

Every founding-member interaction is instrumented from day one — the long-term moat no wearable platform can replicate.

THE VISION

The default operating system for how high-performing Europeans run their bodies and minds — across decades.

A 150-year healthspan horizon. Framed as aspiration. Built as habit. One minimum-effective-dose action at a time.

Sapiens OS HealthSpan is a lifestyle education and behavior coaching platform. It does not provide medical advice, diagnosis, or treatment. The 150-year healthspan horizon is a narrative aspiration, not a medical promise.
